

REINFORCING ELEMENTS:

- ❑ **NO ONE:** Functioning does not get changed, the diffuser droops down when the ventilator is switched off - it is a common and the cheapest version.
- ❑ **TYRES:** Approximately identical appearance of the diffuser with both, switched on and switched off ventilator. Higher price. You can neither wash the diffusers in a washing machine nor spin-dry them unless you detach the tyres.
- ❑ **BRACES:** The attained effect - please, see the pictures below.

Diffuser with braces - inflated

Diffuser with braces - without air supply

Circular diffuser - comparison of installations
